

Project Profile: Healthcare

Smile More Dentistry

Tappan, NY

Architect: Architectural Design Associates

Scope of Work: Renovation

Smile More Dentistry chose Klæ Construction for a second time. Klæ Construction converted a vacant bank branch for Smile More in 2012. The new project is a renovation of an underutilized second floor space to accommodate ten new dental procedure chairs. The renovation included a new waiting area, reception area, handicapped bathroom, and a modified sterile area. New floor, wall, and ceiling finishes were included in the construction. Construction also included a modification and extension of existing plumbing and HVAC, along with new electrical systems including lighting.
